

PROTEIN POWER AT YOUR FINGERTIPS

TO GET YOUR PATIENTS ON THEIR FEET AGAIN

Meeting protein requirements with tube feeds can often be challenging in patients with high protein needs.¹

Modular protein products provide flexibility and allow you to tailor tube feeding regimens without overfeeding.²

This information is intended for healthcare professionals only.

Nutrison Protein Shot is a Food for Special Medical Purposes for the dietary management of disease related malnutrition in patients with increased protein requirements and must be used under medical supervision.
